jQuery	Git

WORK EXPERIENCE

TONICMINDS COMPANY (THESIS PROJECT)   2023 - 2024
FRONT-END DEVELOPER

- Modernized an older program to a modern framework (React, Redux) for improved maintainability.
- Implemented Keycloak for secure user authentication, improving application security and simplifying the login process.
- Built Kepler.gl to visualize location data in real-time to improve better decision-making.

E-COMMERCE WEB APPLICATION   2022 - 2023
SELF-DIRECTED PROJECT

- Developed a full-featured e-commerce web application using React, Node.js/Express, and MongoDB.
- Created an admin panel for managing products and tracking orders.
- Integrated PayPal for secure payments and automated email notifications via Mailgun.
- Provided a user-friendly shopping basket and checkout system.

PARGAN SYSTEM ESFAND   2016 - 2019
FRONT-END DEVELOPER

- Designed a web app for multiple Travel agencies by using JavaScript, jQuery, Bootstrap, HTML, and CSS for the front end, which resulted in a smooth and friendly user experience.
- Generated a 20% increase in search engine traffic to the client's website through the use of a variety of SEO techniques, such as link building, content optimization, and keyword research.
- A new CMS was developed as part of a development team, which makes it very simple for the marketing team to update the website.
- Used Git to collaborate with other developers on various projects.
